## ORCHIDS

BOX 211 - PHONE 2-6243

FORT LAUDERDALE, FLORIDA

HERE IS THE LIST YOU HAVE BEEN WAITING FOR

We proudly present a list of orchid plants, consisting of a wide range of varieties and prices, to meet the demands of all customers interested in the culture of orchids.

We have built our reputation as producers of quality orchids, and some of our stock is still not available for listing, due to the constant demands for many of our varieties. However, our stock is extensive and should you not find listed what you desire, we invite your inquiries. Stock of some varieties is limited, and in a few cases, we can supply only one plant of the variety.

Browse over our list of orchids and compare - - - - we offer only the best types for your consideration.

We have enclosed an order form for your convenience, and should you desire to add some of our orchids to your collection, please reply early.

All orders received will receive our immediate and careful attention, and all plants will be shipped via Railway Express Collect, out of pots, unless otherwise requested.

Should you desire further information concerning any item listed, and have any problems concerning the culture of orchids, please write us. We may be able to help you.

SEED PODS IN DEVELOPMENT

All of our seed listed is priced at \$ 15.00 per three-flask package.

We continue to use only the best of studs and our seedlings do produce quality flowers, as attested by the following awards: San Juan, Puerto Rico, best flower in the show; Dallas, Texas, First and Second prize in seedling class; St. Petersburg, Florida, best flower in the show, and many others.

We maintain our policy on seed as we have in the past - we guarantee satisfaction to our seed customers.

Please state second and third choices in the event your first selection does not prove fertile, or is sold.

The list of seed should be ripe approximately ten to twelve months after the date of crossing. All pods listed are now in development.

Mail your reservation blank for seed, and you will be notified when the pods are ripe, whether fertile or not.
